

**Disease Preparedness in Schools:
A Guide for School Nurses - Module III**

Online Module
Event # 00168

At the conclusion of the online module, learners will be able to:

- describe the school's role in prevention of the spread of influenza during an outbreak.
- identify preventive measures about which they could educate students and other school personnel.
- collaborate appropriately with local health department officials in the case of an outbreak.
- work with school administrators to prepare a plan for an extended school shut down.
